

EVENT DETAILS

- Join this afternoon session to pilot test CTAC's new *Tools for Access* workshop entitled **Oral Health Care and People Living with HIV and HIV/Hepatitis Co-infection**.
- The workshop addresses the oral health care needs of PHAs and people living with co-infection, the dental care treatment access issues they face, and consults with participants on policy options to address them.
- Provide invaluable feedback on this community workshop facilitated by an openly disclosed community member.

For more information about this event, please contact leah@ctac.ca

Hosted by:

Canadian Treatment Action Council

CTAC is a national non-governmental organization run by and for people living with HIV/AIDS, including those who are co-infected with viral Hepatitis. CTAC promotes informed public policy and builds awareness on issues that impede access to treatment and health care for people living with HIV/AIDS. Treatment is a broad concept, which includes western, traditional, complementary and alternative medicine.

For more information about CTAC, please visit us at:

www.ctac.ca
